Interactive Connect VoIP Assessment Services

A quality installation of a VoIP Telephony system must begin with a proper VoIP Assessment of the data infrastructure. Benchmarks must be taken and bottlenecks identified to ensure all segments on which voice will be carried are sufficiently optimized. Leaving a network to chance without hard metrics gathering on the front end could mean the difference between a happy, satisfied user base and an overwhelmed technical support desk at cutover.

Our VoIP Assessment Services use state-of-the-art, cloud based software along with micro appliances that are simply plugged into your network for the duration of the assessment. Typically, the engagement requires no installation of software or hardware on your part and tests are minimally intrusive to your business and network. The output deliverable to you is a comprehensive assessment of bottlenecks, bandwidth deficiencies and Mean Opinion Scores (MOS) for each link.

Tables, graphs and plain text summaries of recommendations to make your network “VoIP Ready” are provided as well as an interactive consultation with our engineers to explain the report and recommendations.

Connecting Business, People and Technology...

Pricing (Valid through February 2011)

BASELINE PACKAGE (1) Location, (1-100) Endpoints = **\$4,800**

- Add Location = \$2,000 each
- Add 100 Endpoint Block = \$1,000

Example - A site with 3 locations and 325 endpoints would be:

<i>Baseline Package</i>	<i>\$4,800</i>
<i>Add 2 locations</i>	<i>\$4,000</i>
<i>Add 2 endpoint blocks</i>	<i>\$2,000</i>
<i>TOTAL</i>	<i>\$10,800</i>

Assumptions

- A micro appliance will be shipped out to each remote location. Customer may be responsible to plug the appliance into the network in a place recommended by the engineer.
- If applicable, customer will be required to ship the appliance(s) back within 3 days post assessment or be charged a \$25/day late fee.
- A 1 hour consultation post assessment with the engineer is included. Any additional time requested will be invoiced at a rate of \$180/hour.
- If customer's network fails the assessment, it is recommended that a follow-up assessment be purchased to evaluate that recommend changes have been performed.
